

Full-Time Technical Consultant w/ J2EE and .NET

Job Number: 30002

Holchan, LLC is looking for a J2EE and .NET programmer to join our consulting team as a Technical Consultant. The main task of a Technical Consultant is to provide effective technical solutions to our clients' business needs.

All senior CS students that meet the requirements and are able to carry out the listed responsibilities are encouraged to apply. Priority will be given to ACM Programming Contest participants.

Responsibilities

- Work closely with software development project teams to implement and deploy enterprise-class technical solutions.
- Provide hands-on support and advice to development and production teams.
- The Technical Consultant will work primarily with our clients in the Houston area. However, travel throughout the US might be required according to client needs.
- Design and development of custom software components on multiple platforms and for multiple applications.
- Design and development of web-based multi-tiered applications.

Requirements

- Excellent communication and presentation skills.
- Ability to work reliably in fast-paced consulting environment.
- Willingness to lead, learn, plan, and execute projects with minimal supervision.
- BS in Computer Science with a 3.00+ GPA in CS courses (or last year CS major with a recommendation letter from a professor).
- Object Oriented Design and Programming including UML modeling.
- 2+ years of all the following: Java, SQL, .NET (C#, ASP, VB).
- Experience in all software layers: GUI, middleware, data, and transport layers.
- Some experience in consulting environments and large project implementation.
- Knowledge of Software Development Lifecycle methodologies and processes.
- UNIX, Linux, and Windows skills.
- Knowledge of internet protocols and networks in general.
- Familiarity with current technology standards: SOAP, XML, XSD, XSLT, JMS, HTML, etc.
- Experience with enterprise software such as SAP R/3, Siebel, Peoplesoft, TIBCO, WebLogic, etc is desired, but not required.
- Course work and related projects will be considered.
- Java, Microsoft, and/or other technical certifications are a big plus.

How to Apply

Email your cover letter, contact information, and Word resume to Laura Gonzalez at lgonzalez@holchan.com indicating the Job Number and answers to the following:

- Available to work in the US for any employer?
- Best time to contact you.
- If hired, how soon can you start?
- How many years of professional experience as programmer?
- Travel availability (local only, national, international).
- Travel frequency (0%, 25%, 50%, 100%).
- Willing to relocate if needed?
- Desired yearly salary.
