

Full Time Software Developer Position

The Systems Group at [Multiphase Solutions, Inc.](http://www.multiphase.com) is looking for a team member to help provide customized Software to major Oil and Gas companies all over the world.

Our software's objective is a user-friendly interface that provides relevant and reliable information to a variety of customer needs.

In order to provide this type of software, the candidate will interact with Engineers and Project Managers on a day to day basis plus collaborate with customers as needed.

The main tasks involve developing GUIs as well as internal components to provide information to the customer. Additionally, the candidate may be trained for software's testing, deployment, installation, connectivity to Data Acquisition Software, documentation, and troubleshooting.

This position involves developing new software in VB.Net and it may involve supporting ASP.Net, SQL, and VB6 code.

The applicant must have:

- VB.Net Programming Experience
- Familiarity with Visual Basic (VB6)
- Object Oriented Programming Experience
- Strong interest in designing and developing customized GUIs
- Familiarity with network configurations
- Passion for learning new technologies
- Good Written and Oral Communication Skills
- B.S. Degree Minimum

Preferred skills:

- ASP.Net programming
- SQL programming
- Experience with web technologies for design and development of real-time graphic data websites.
- Visual Design Skills

The successful MSi employee is one who continuously learns, demonstrates strong problem-solving skills, and strives for excellence.
